

HOME DESIGN SOLUTIONS

Do Your Spaces Suit You Perfectly?

HOME DESIGN

Introduction

Think about all the organizational spaces throughout your home, like the entertainment area, bedroom closet, kitchen pantry, garage, and laundry room. How do they make you feel?

Messy? Crowded? Frustrated? We can help. Let's explore the rooms and closets in your home and see how a custom design by Diplomat Closet could transform the way you enjoy your space.

CUSTOM SOLUTIONS

The Perfect Pantry

When you have the perfect pantry, cooking is a delight. Everything is easy to see and store. Your pantry is an extension of your kitchen and should feel bright, sleek, and organized. Don't settle for a cramped pantry. You can have so much more. Even in a small space, we can create a custom storage solution that adds beauty and functionality to your kitchen.

JOYFUL IDEAS

The Dream Kitchen

It's time to make your dream kitchen a reality. Kitchens have become the go-to spaces for daily gatherings and family time. What would make your kitchen more functional for your family? Maybe you need pull-out spice shelves, built-in double ovens, special dish displays, or an oversized wine rack. We custom-build your storage to suit you perfectly, so every moment in your kitchen is an absolute joy.

PERSONALIZED SOLUTIONS

The Custom Closet

We'll let you in on a little secret: Your bedroom closet is a place to be selfish. It's a special space where everything should be tailored to you. How do you get dressed in the morning? Do you prefer hanging or folding clothes? Do you need space for 100 pairs of heels?

Custom closets also go far beyond the bedroom. Imagine having custom storage in your kids' play area, guest room, sunroom, or study. We'll help you redesign all the nooks and crannies of your house to incorporate beautiful custom storage.

REFRESH IDEAS

The Efficient Laundry Room

Do you dread doing laundry? Maybe it's because you have a cramped, outdated laundry room. When the room is customdesigned to fit your lifestyle, laundry day is a breeze. You have space to move and store everything you need. Your laundry room fits right in with the style and decor of your home. Let's look at how we could work together to refresh your laundry room.

SPECIALIZED ROOMS

The Functional Mudroom

Often overlooked, your mudroom and entryway are bursting with opportunities for sensible storage. Imagine a neat line of boots on shelves, a custom umbrella slot, ample coat storage, or even a little built-in food dish for the family dog. With custom design, a mudroom goes from dull to delightful.

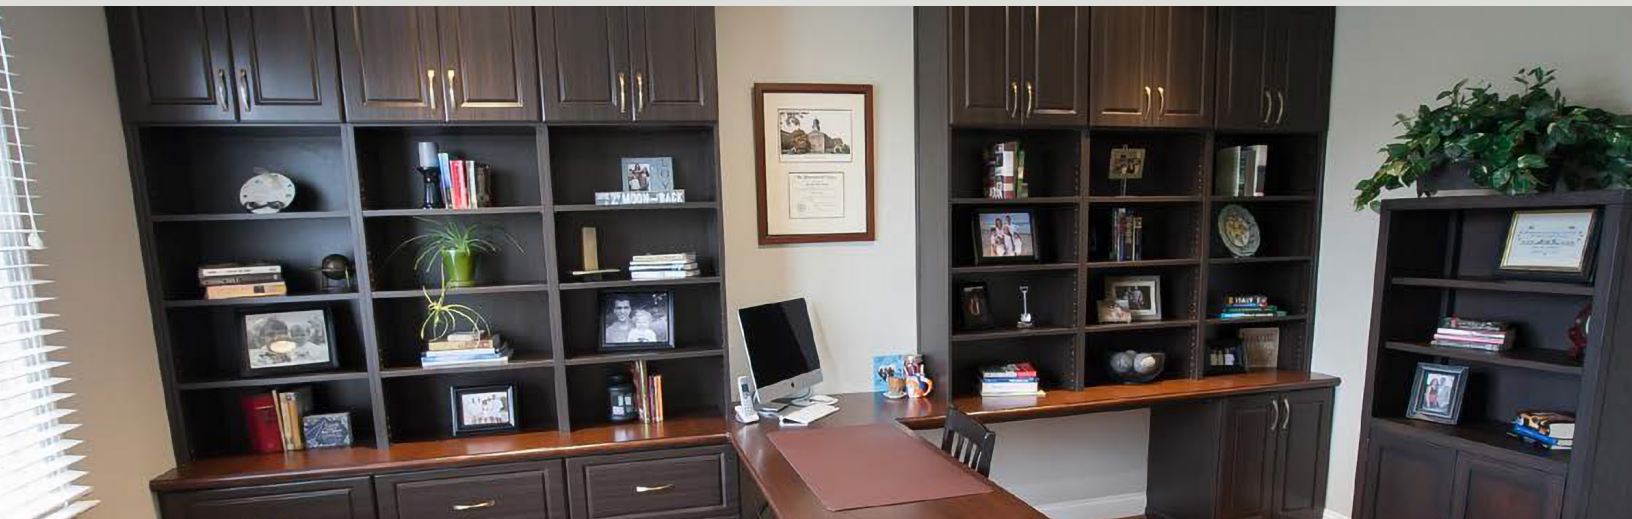

BUILT-IN SOLUTIONS

The Zen Office

Working from home is one of the nation's biggest trends. Almost everyone spends time working at a computer, checking work apps, and managing a bit of business from home. Wouldn't it be wonderful to do it in a space that feels tidy and professional? We build custom offices that seamlessly blend home life with work life.

And if you need a crafting, sewing, art, or hobby space, we can handle that too. Let's talk about the custom spaces in your home and make sure they're working for you.

TAILORED COMFORT

Entertainment Room

You probably spend a lot of time in your living/entertainment space. Kids gather round to watch their favorite cartoons, and adults snuggle in for coffee and conversation. But does your current space feel right? Does it lift your spirits and keep everything organized? We can custom-build an entertainment space that fits your lifestyle, day in and day out.

STORAGE POTENTIAL

Organized Garage

Don't forget about the garage. It holds huge potential for storage space, tool organization, a workbench, extra food storage, and displaying your treasured vehicles. Our custom garages are some of the most amazing transformations we do. Connect with us today to turn your garage into a handsome, fully-functional room in your home.
